EDUCATION

Chitkara University

Bachelor of Technology in Computer Science — CGPA: 8.98 / 10.0

Punjab, India

August 2023 – Present

TECHNICAL SKILLS

Programming: Python, SQL, Java, TypeScript

Web & Backend: React, Node.js, Express.js, WebSockets, Tailwind CSS

Cloud & Infrastructure: AWS, Azure, Docker, Git

DevOps & Automation: GitHub Actions, Infrastructure as Code, Containerization, Turborepo

Databases: MongoDB, MySQL, Amazon RDS, DynamoDB, PostgreSQL, Prisma ORM

Data & Visualization: Pandas, Numpy, Matplotlib, Seaborn

EXPERIENCE & TRAINING

Development Trainee

March 2025

SHOR Foundation

Panchakula, India

- Delivered 3 intensive web development training sessions totaling 12+ hours to 40+ Indian Army officers, covering modern frontend frameworks, deployment workflows, and full-stack development fundamentals. Collaborated closely with military personnel to identify technical requirements and tailored training methodology to improve engagement and practical adoption, contributing to the modernization of internal web development practices.

PROJECTS

Excelidraw | TypeScript, Next.js, Node.js, Express, Turborepo, PostgreSQL, Prisma | [GitHub](#)

2026

- Architected a Turborepo-based collaborative whiteboard platform with a Next.js frontend, Node.js/Express backend, and dedicated WebSocket server, supporting real-time collaboration for 50+ concurrent users across secure room-based sessions.
- Implemented JWT-based authentication and optimized WebSocket event handling to reduce synchronization latency by ~35%. Managed global canvas state with Redux Toolkit and persisted drawing sessions using PostgreSQL and Prisma ORM, enabling seamless recovery across reconnects.

Vastraah – E-Commerce Platform | React, Node.js, Express.js, MongoDB, Docker, Tailwind CSS | [GitHub](#)

2025

- Architected and designed a full-stack e-commerce platform with RESTful API architecture featuring 15+ endpoints handling user management, product catalog, and order processing.
- Containerized the application using Docker to ensure consistent environments across development and production.
- Implemented role-based access control with JWT authentication enabling secure user and admin workflows.
- Optimized MongoDB schema design; integrated secure payment gateway and cloud media uploads.

Employee Directory Application | Python, Flask, AWS S3, DynamoDB, CloudWatch, SNS | [GitHub](#)

2025

- Deployed a Python/Flask application on AWS across 2 Availability Zones within a custom VPC, using IAM least-privilege roles for S3 access and DynamoDB as the primary NoSQL datastore for employee records.
- Implemented end-to-end observability with CloudWatch dashboards and SNS-triggered alerts on EC2 CPU utilization exceeding 70%, ensuring proactive infrastructure monitoring.

CERTIFICATIONS

Networking Fundamentals (Akamai, 85%)

2024

Foundations of Modern AI and Cybersecurity (Google)

2025

AWS Cloud Technical Essentials (Amazon Web Services)

2026

Python Essentials 1 & 2 (OpenEDG Python Institute)

2026

CCNA: Introduction to Networks (Cisco)

2026

CCNA: Switching, Routing, and Wireless Essentials (Cisco)
